ANNUAL CATALOGUE

OF ESCULENT VEGETABLE AND OTHER SEEDS OF THE
CHOICEST AMERICAN AND IMPORTED VARIETIES.

LINNEAN BOTANIC GARDEN AND NURSERY,
WM. PRINCE & SONS, PROPRIETORS,
FLUSHING, NEAR NEW-YORK.

N. B. THE SEEDS are of the finest quality, and such as will recommend themselves. They possess the advantage of being raised under our own observation, or when imported from confidential correspondents who grow them expressly for us, of being tested to our satisfaction, and their *accuracy and vitality are therefore expressly guaranteed*. The imported seeds are mostly obtained from the south of Europe, where they become so well matured, that they preserve their vitality far better than English seeds, the latter being so humid a climate. The Catalogue will be found to contain many new and very choice varieties *never before offered to the public*, and incomparably superior to many of the old varieties; and it is intended to enrich this branch of the business with the same zeal which has been extended to the other departments. A Supplementary Catalogue is annexed, enumerating above 600 varieties of Annual, Biennial, and Perennial Flower Seeds, very many of which are of extreme rarity; and they being mostly collected from Plants in this establishment, their excellence may be relied on. The principal object in view is to furnish venders of Seeds with wholesale quantities at reasonable rates, but to accommodate our correspondents we cannot object to furnishing smaller parcels for family gardens when applied for. Specimen beds are sown of every variety, for the inspection of visitors; and accurate descriptions are made for the purpose of perfecting a cheap work which it is proposed to publish, containing descriptions of the different

varieties of Esculent Vegetables, &c. with directions for their culture, &c.

A liberal discount will be made on large orders, or where a remittance is made in advance. *All orders for Seeds must be sent direct, and no person whatever is authorized to sell seeds for us, or on our account.*

ESCULENT VEGETABLE, FIELD, AND FLOWER SEEDS.

The Proprietors announce to all venders of Seeds, and to those who may desire to undertake such business, that they will supply every variety desirable, at very low rates, and at a liberal credit, and the wholesale prices are so moderate, that they allow a great profit to the retailer, it being the intention to render this branch of business profitable by its great extent, and not by enhanced prices.

Very extensive grounds are now devoted to raising the seeds with the utmost circumspection and purity, and the arrangements in foreign countries are such as to ensure accuracy.

Every person desirous to engage in the sale of the above articles, will, on application, receive all the information requisite to the object, and such an establishment ought to exist in every town in the Union. The present period is particularly eligible for forming arrangements for business, preparatory to the regular sales.

Where persons are not sufficiently conversant with the subject to make selection of the varieties best suited to their respective locations, and to proportion the quantities in accordance with the usual demand; such selection will be made by us if desired.

Bulbous roots, Dahlias, Pæonies, &c. being usually vended in a dry state, can with perfect convenience be made objects of sale in Seed stores, and they will be supplied at so liberal a discount, as to make their sale an object of importance. The period of sale is from the 1st of October to the 1st of May, but Dahlias will succeed if not planted till the middle of May, or 1st of June. Double Dahlias, of named varieties, selected by the Proprietors, will be supplied at \$3, \$4 50, and \$6 per dozen, according to quality and rarity, and these can be retailed at 100 per cent profit. The reduced price for Bulbous Flower Roots, by the dozen, and in assortments, are stated in the New Catalogue, and the retail profit thereon is from 25 to 100 per cent.

Great attention has been paid to obtaining from foreign countries the finest Agricultural seeds, among which are the following—Pacey's and Scotch Perennial Rye Grass; Italian Rye Grass; English Potatoe Oats, weighing 44 lbs. per bushel; Early Angus, and Hopetoun Oats, superior to any others in Europe; English, French, and Dutch White Clover Seed; Provence Lucerne, the finest known; Trifolium Incarnatum, or Crimson Clover, very early; Taylor's Fortyfold, and early Nonpariel Potatoes, Skinless oats, Large Yellow Sugar Beet, and Mangold Wurzel; Superior Purple-top, Swedish Turnip, or Ruta Baga; Large White, and Large Yellow Field Carrots; the best kind of Field Turnips, and Cabbages for Cattle, &c. The seeds of these can be furnished in large quantities, and a difference in price is of course made when very large parcels are desired, and where the purchase is made for *cash*, a discount will be allowed. Those who wish it, can forward lists stating quantities desired, &c.; which will be priced by us, and returned by the first mail.

Some explanation may be requisite in regard to the course adopted in making sales to venders. The seeds are usually supplied by the pound or bushel; but of the higher priced vegetable seeds, and of such as are in but little request, parcels of half and quarter pound, and of half, quarter and eighth bushel will be supplied on similar terms.

A liberal credit will be allowed, and where a good understanding is established, there will be no difficulty in arranging this point to mutual convenience, and on this, and every other subject, the suggestions of correspondents will receive the fullest consideration. The different Treatises herein enumerated will be supplied to venders at 20 per cent. discount. A Seed Catalogue, containing the New-York retail prices by the oz. quart, &c., as a guide to venders will be sent to every applicant. Seeds of the New crop can be supplied in August and September, and Turnip seeds, and some other kinds, can be furnished the last of June. When so desired, boxes of assorted Seeds can be supplied, selected to suit the climate of any part of North, or South America, the West Indies, or elsewhere, and of any value from \$5 to \$100.

Implements of Husbandry and Garden Tools, of every description; Agricultural and Horticultural Books, and the Compressed Dry Herbs, prepared by the Shakers, can be supplied to any extent.

The Proprietors have further to state, that their Fruit and Ornamental Trees, &c. are of *large size and vigorous growth*, and superior to any before offered to the public. The establishment contains at the present period, *more than a million of Trees and Plants*, and the Proprietors are willing to enter into arrangements of the most liberal description, both as to prices and credit, with all such persons as desire large quantities of Trees, &c.; and with those proprietors of Nurseries, who wish to extend their collections, and such other persons as wish to establish *New Nurseries*, they will enter into arrangements on terms which will allow ample time for *advantageous reimbursement*. Any persons who are desirous to act as agents for receiving orders for Trees, in Towns where no agency at present exists, will please to communicate their views in regard thereto. If any correspondents have raised seed of very superior Vegetables, &c. they will please to communicate the fact. Any packages intended for us, must be left with *A. D. Maintain*, corner of South and Beekman streets, New-York; but letters should always be sent by mail.

REMARKS.—All orders for Fruit and Ornamental Trees, Greenhouse Plants, Bulbous Flowers, Dahlias, or Seeds, must be sent, *direct to us, or through a regularly authorized agent, and not through the agency*

of any person who vends similar articles. Every invoice transmitted by us will have a printed heading and our signature, to prove it genuine, and we assume no guarantee whatever where such an invoice cannot be produced. We mention these cautions for good and conclusive reasons, and we most particularly enjoin their strict observance on purchasers. When orders are sent, directions should be very precisely given how the packages are to be marked, and by what route or conveyance they are to be forwarded, &c. Orders from a distance will always receive the utmost attention, both as to packing and forwarding, and it is only requisite for persons sending orders, to specify the extent of land and water carriage, and the articles will be packed accordingly.

N. B. The New Catalogues of every Department have just been published, *with reduced prices*, and will be sent to every applicant.—Packages for the Western States, can be sent by way of the New York canal, or by New Orleans, or by the way of Philadelphia and Baltimore through Pittsburgh, Wheeling, &c.

All Proprietors of Nurseries, and Venders of seeds, &c. are invited to visit and inspect our Establishment.

I. F. Jones & Co., Printers, Jamaica, L. I.
